Thána	1	Bone Mill ...	210

Famine.—In 1899-1900 the rains failed and the district was slightly affected by famine. The total area affected was 345 square miles, and the population, 101,000 or 12 per cent. of the total. Relief works were opened in January 1900 and continued till November. In 1899-1900 the highest daily average number relieved was 10,301 and 4,189 were in receipt of gratuitous relief. The death-rate per mille was 67·82. The total deaths from all causes on relief works were 322, of which 95 were attributed to dysentery and diarrhœa and 134 to cholera. The percentage population of the sexes and children among relief workers in the district was 37 males, 46 females and 17 children. The average wage per worker unit was Re. 0-1-5. (For other details, see Table XIII.)

Plague.—The first indigenous case occurred early in December 1896, though imported plague was detected as early as the first week of October of that year. Bándra was the first to suffer; and the disease spread to Bhiwndi, Kurla, Bassein, Bháyandar, Thána, etc., in rapid succession. By degrees the whole district became affected. The following figures show the total mortality from plague since 1896-97:—
